QUENCHING FURNACE

Electric oven for heat treatments, unique of its kind, specially designed to temper small blades (up to 150 mm).

It reaches the maximum temperature of 1150 degrees in a very short time (about 25 minutes), and maintains it with absolute precision and constant uniformity. This model is designed for use with a 3 kw domestic meter, thus ensuring excellent performance with low energy consumption.

The oven works silently thanks to a relay and a latest generation digital thermoregulator.

It is also finely painted, has an innovative design, with extremely low overall dimensions and weight.

DATA SHEET

TECHNICAL DATA

TYPE	SINGLE-PHASE VOLTAGE	FREQUENCY	WATTAGE	MAX TEMPERATURE
FT-Lite	v. 230	Hz. 50-60	1.4 kw	1150 C°
